

## A VARIETY OF PROJECTS

Since early 2014, 365 has been supplying to a number of major infrastructure and high profile projects, as per the below:

- BFK Ebbsfleet – Wallasea Island Wild Coast Project
- M6 – Intelligent Highway
- AML iron ore mine- Sierra Leone

Successful completion of these projects has posed numerous challenges which 365 have been able to meet thanks to providing high quality service and a broad spectrum of long-term and short-term solutions.

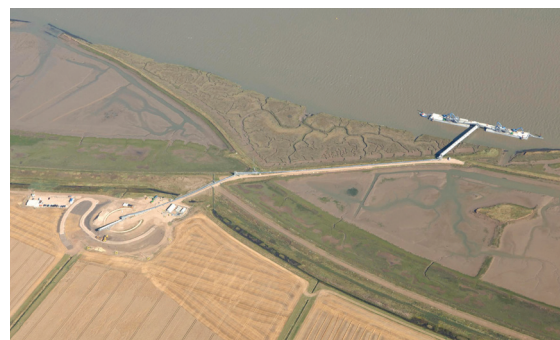

Although, 365 has always emphasised **quality over quantity**, we believe that a business should not be forced to compromise and should always strive to achieve both. In 2015, 365 started supplying highly experienced plant operatives to a variety of highway projects. The quality of service provided to this project alone has resulted in the numbers of 365 operators having grown to 130 by 2017.

365 prides itself in a pool of reliable and loyal professionals, the relationship with whom enables us to offer our clients temporary solutions as well.

A high level of service provided by 365 has ensured an extensive growth of both our client and candidate databases. 365 has always been placing emphasis on an individual approach and building personal relationships with both.
